

ARKA LIKAS

Crafting a sustainable tomorrow...

Clean Energy Solutions

Accelerate clean energy through quality, cost-effective advisory and engineering solutions. With intimate local knowledge and extensive global expertise, we deliver results across Southeast Asia.

Sectoral Focus

Utility-scale solar PV

Rooftop solar

Floating Solar

Onshore Wind

BESS & microgrids

Decarbonization Strategy

What We Do

01

Owner's Engineer

Planning, feasibility, design review, construction monitoring, QA/QC, and commissioning support

02

Lender's Technical Advisor

Pre-financial close due diligence, construction monitoring, and operational audits with risk mitigation.

03

Engineering Design & Support

Energy yield modeling, detailed design, grid studies, and EPC bid engineering support.

04

Plant Audits & Performance

Independent verification of performance, gap analysis and mitigation strategies for operational optimization.

05

Pre-development Advisory

Strategic guidance from concept to bankable documentation and bid process support.

Why Us

Local knowledge,
global expertise

Responsive,
flexible delivery

Cost-effective
model

700+MW advisory
experience

Strong partner for
international companies
